Holiday Inn Express, Jackson, CA (209) 257-1500

Sale Site: The sale will be held at Circle Ranch in Ione, CA. See map on back cover.

Herd Health: All bulls in the sale have been Anaplas vaccinated and have been tested free of BVD persistent infection. Health protocols available from either producer detailing the timing and brand names of vaccinations and worming upon request.

Semen Testing: All bulls selling have passed a rigid semen test and fertility evaluation by an accredited technician.

Retained Semen Interest: The Beef Solutions breeders are retaining one-third semen interest on all bulls selling in the sale, unless stated otherwise. Buyer receives possession and full salvage value on the bulls.

Supplemental Information: A supplemental sheet, with complete up-to-date performance information on all bulls, is immediately available from either producer. All performance information is available sale day in hard-copy form, this sheet and any announcements from the block will take precedence over the printed material in the sale book.

Angus Genetic Information: All potential carriers for known genetic conditions: AM, NH, CA, M1 and DD have either tested free or are excluded as possible carriers by pedigree.

LiveAuctionsTV Real-time bidding via the Internet and live video will allow buyers to bid on animals just as if they were present at the sale. Buyers must create an account and request a buyer number. Instructions are available to walk you through the account setup process. Web address: www.liveauctions.tv. Email address: brad@liveauctions.tv. Contact@ Brad Fahrmeier (816) 392-9241.

Livestock Insurance: An agent is available sale day to facilitate any insurance needs you may have. Please inquire at settlement time.

Bull Delivery: Free delivery in California and adjoining states up to 300 miles. All deliveries are made at the buyer's risk. Take \$100 off the purchase price for every bull hauled home sale day.

Hospitality: Refreshments will be available throughout the day, and a complimentary Prime Rib lunch will be served at noon.

Bull Guarantee: All bulls selling have passed a Breeding Soundness Exam prior to sale. To insure your investment, the Beef Solutions Team will guarantee all bulls against breeding injury, and to be sound breeders for the first breeding season. Breeding Season is defined as the 90-day period following the first turnout of bulls. If a problem arises, contact us immediately and we will provide a replacement bull if available, or if the buyer prefers, credit toward a bull will be given for the upcoming sale, less salvage value of the injured bull. Notification of an injury or problem PRIOR to bull being sold for salvage is required for the actions of the guarantee.

Terms & Conditions: All purchases are to be settled for SALE DAY unless prior arrangements have been made. Cattle will all sell under the suggested Terms and Conditions of the American Angus Association (http://www.angus.org/Pub/suggested_sale_terms.pdf).

Disclaimer: The Beef Solutions Breeders and Circle Ranch assume no liability for accidents or injury that may occur. Attend the sale at your own risk.

Photo Credit: Special thanks to Logan & Stevie Ipsen for bull photos; Savannah Molina for bull and landscape photos; Rick Raef at Working Ranch Photography, and Justin Kilgore for landscape photos.

Welcome to the 13th Annual Beef Solutions Fall Round Up Sale THURSDAY, SEPTEMBER 26, 2019

173 Performance Angus & SimAngus™ Bulls Sell 8 Angus Replacement Heifers

Fellow Cattlemen and Valued Customers,

Hello, and welcome to the Beef Solutions Bull Sale, 2019! We thank you for your support and, if you are new, we look forward to the opportunity to earn your business.

For the past 14 years, we have been committed to bringing the very top-end of our program to you and this year is no different. You will see the amount of sires we are using is shrinking and the consistency of bulls is stronger than it has ever been. Variety is not the spice of life when breeding cattle. To have consistency, it must be selected for and our commitment to creating larger sire groups helps take the guess work and inconsistencies out of your resulting calf crop.

Our commitment to customer satisfaction starts with our genetic selection and flipping through the sale offering, you will find sires that have been hand-picked, by us, from all over the country. Many of the reference sires have been raised and developed by us to thrive in this foothill environment. For us to use a sire, he needs to check all of the boxes that directly affect our cow/calf customer base. These new sires represent cow families that are fertile, great footed, problem-free and possess the "Beef Solutions look" that you have come to expect.

The sale week kicks off with bulls available to view and a pre-sale social on Wednesday evening. This is a low-key event where the bulls are easy to see in big lots and gives us a great opportunity to visit with you about potential purchases. We will have steak sandwiches available all evening. Please join us for a prime rib lunch on sale day, Thursday, September 26 at noon in Ione, California.

As always, please contact Tim or Joe with any questions about the bulls, their dams, and siblings or just simply to visit. We always welcome and appreciate your call.

*Win a
FREE
Bull!*

See page 27 for details!

Join us for a casual Steak-Sandwich Dinner the evening before the sale at the ranch headquarters!

The Beef Solutions Team will once again offer the user-friendly toolbox in this year's sale book to help you in your buying decisions. Below the pedigree and genetic information, we've listed percentile rankings within breed and labels for individual outliers for particular traits.

Additionally, we're providing a toolbox that identifies different solutions (for Angus and SimAngus™). This reference is helpful to quickly find sires that can provide a specific service – like breeding heifers or improving carcass and performance – in your calf crop.

ANGUS BEEF SOLUTIONS

■ **CALVING EASE SOLUTION** - A tool to consider when selecting heifer bull candidates. Bull has a 1.4 Birth Wt. EPD or less and a Calving Ease Direct (CED) EPD in the top 40% of the breed.

■ **PERFORMANCE SOLUTION** - Bull ranks in the top 50% of the breed for his Weaning Weight and Yearling Weight EPDs.

■ **\$EN SOLUTION** - Bull ranks in the top 50% of the entire breed for \$Energy.

■ **\$W SOLUTION** - Bull ranks in the top 50% of the entire breed for \$Wean.

■ **GROW SAFE** - Complete Growsafe Feed Efficiency data available on all Angus bulls upon request.

SIMANGUST™ BEEF SOLUTIONS

■ **CE SOLUTION** - Bull Ranks in the top 50% of the entire breed for Calving Ease.

■ **PERFORMANCE SOLUTION** - Bull ranks in the top 50% of the breed for his Yearling Weight EPDs.

■ **ALL PURPOSE SOLUTION** - Bull ranks in the top 50% of the breed for his All Purpose Index.

■ **STAYABILITY SOLUTION** - Bull ranks in the top 50% of the entire breed for Stayability EPD.

■ **MATERNAL CALVING EASE SOLUTION** - Bull ranks in the top 50% of the entire breed for Maternal Calving Ease EPD.

GRATITUDE • *Thankfulness* • APPRECIATION

Thank you!

COMMERCIAL CATTLEMEN
are the **backbone** of our operation and the
foundation for everything we do.

We are proud to count our loyal customers as
partners and friends and we are humbled to
welcome new customers.

We will work to earn your repeat business,
your trust and your friendship for years to come.

Photos by Rick Raef, Working Ranch Photography

How do you see the **FUTURE** of **BEEF PRODUCTION** in the *West?*

The industry seems abuzz about the direction of genetic improvement and if you ask a group of cattlemen to define beef cattle improvement, you'll likely get as many opinions as you will folks surveyed. For us, we see the future quite simple and the direction of our herd is clear.

- Produce the most pounds our environment will support.
- Optimize our total cowherd performance through consistency.
- Use sires of proven maternal lineages for predictable maternal performance and efficiency.
- Produce profitable, problem-free females that leave a lasting impact for generations.
- Use EPDs and Genomics as tools to complement, not replace, phenotype and actual production in our genetic selection.

These goals have been developed by raising livestock alongside our customers and listening to YOU. Every time we talk to commercial cattlemen we are listening and developing a plan of what our genetics will look like in the future. Interestingly enough, it's mostly just a sound board because most commercial cattlemen and women are saying the exact thing we have been observing in our own operations and we have already made the move.

 *Bruin Ranch*

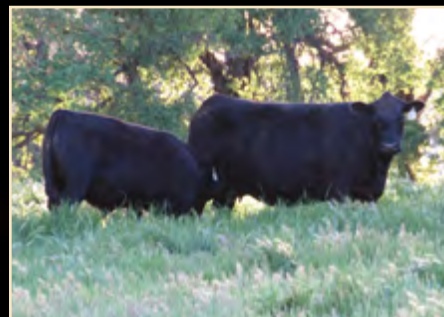

Bennett Fischer at Dawn.

PHOTO CREDIT: Rick Raef, *Working Ranch Photography*

For a bull to produce
**OUTSTANDING
DAUGHTERS**
He has to come from an
**OUTSTANDING
MOTHER**

It is true that the best way to raise better cattle is by using better bulls; when retaining replacement females in a herd, a bull's mother will have a greater genetic impact on his daughters than the bull himself, so she'd better be a good one.

LD CAPITALIST 316 *Summer Yearlings*

LD Capitalist • Sire of Lots 1-13.

LD Capitalist 316:
316 burst onto the Angus scene with his incredible run of calf data and phenotype that was second-to-none. In person, he is an absolute powerhouse sporting incredible foot shape, structure and muscle pattern and presence. The data that 316 combines with his phenotype proves him to be a no-miss heifer bull. The heifer mates to these bulls are absolute stunners and early daughters show exceptional udder quality.

Further is a true feature of our sale, possessing all the ingredients for herd bull material. He is a personal favorite of the LD Capitalist 316 sons, as the highest performing of his contemporaries with natural thickness and herd bull presence. His dam Bruin 1682 Blackbird 6225 is a maternal sister to Bruin Envy 7248 who went on to serve as a herd sire for Open 8 Ranch and Crouthamel Cattle. His elegant dam is long fronted, feminine and deep bodied. She combines these features with breed-leading udder quality and teat size.

In the 2018 sale, we referred to 5292 as a rising star in the Bruin Ranch program and we are eagerly awaiting her third calf and expect her to cruise into the donor program with ease. 5292 embodies everything we look for in maternally efficient cattle. She is perfect uddered, supplies ample milk and while responsible is so gentle that she is one of our kids favorite cows. Get in on a son of this cow early because when we start offering large groups of her sons, I'm sure this bull will prove to be a great investment.

KOUPAL KOZI 418 *Summer Yearlings*

Koupal Kozi 418 • Sire of Lots 14-22.

Koupal Kozi 418

Kozi sons are incredibly consistent, being beefy, big-middled bulls with natural width and herd bull presence. Kozi's dam (263) is one of the top producers in the Koupal Angus program with a phenomenal udder and is a maternal sister to the breed standard for quality and phenotype, Ebonette 734. Our first Kozi daughters are stunning, sporting picture-perfect udder suspension with an abundance of MILK. With increasing proof, Kozi is a logical sire to carry the torch for the Rainmaker 654X sire line.

Lot 17 • Bruin Friction 8231

Flush Brothers, Lots 17-20:

This set of flush brothers out of 5219 were created to compliment our Blackbird female line. 5219 is one of the deepest bodied cows on the ranch and combines base width and femininity in a package that is rare. 5219 carries on the maternal legacy of Forever Lady 163 GDAR, one of the most famous and influential pathfinder cows in breed history. These pedigrees are maternally loaded, combining the best of Rainmaker 654 X, Forever Lady 163 and SAV Emblynette 7260. We are excited to incorporate one of these out-cross sires into our AI program this fall.

Lot 17 • Bruin Friction 8231

Lot 18 • Bruin Formation 8213

Bruin 1023 Blackbird 8616, at 11 years of age, with her natural calf Lot 39.

Flush Brothers, Lots 21-30:

Through production and type, one cow has asserted herself at the top of our program. 8616 is a model beef cow; she is long fronted and feminine, but powerful and long – much like her mother. At 11 years old she weaned the heaviest bull calf and stands on an excellent set of feet and legs. 8616 holds a flawless production record maintaining a nursing ratio of 107. **Bulls from outstanding mothers produce outstanding daughters.** If you keep replacements, you can't go wrong with a son of 8616.

BRUIN TORQUE 5261 *Summer Yearlings*

Bruin Torque 5261 • Sire of Lots 31-35.

Bruin Torque 5261

Bruin Ranch raised and owned sire with Strommen Ranch and Upchurch Brothers

Torque has become a household name in the Angus business for breeders seeking foot quality, docility, length of body and maternal efficiency. He is the logical choice for passing on an intensely bred Right Time pedigree in a modern performance package. The response from purebred breeders has been outstanding and many who have early calves are coming back as repeat customers. We expect Torque to have a huge year in semen sales and despite his excellent semen production we recommend that you order semen early as this sire will be a major factor in the 2019 breeding season.

Flush Brothers, Lot 35-37: Last year 4264 raised her third natural calf and put herself on center-stage in our donor program. This flush of Resource bulls are full brothers in blood to Bruin Envy 7248 who is owned by Open 8 Ranch in Montana and Crouthamel Cattle of Washington and was used in our AI and Embryo Transfer programs. The flush is lead-off by Bruin Forgiven, a bull who has been a favorite to visitors since October of 2018 when he was just 45 days old. He is very powerfully made with a wide back and stout rump. While this mating is bred to be powerful, we expect the daughters to look like 4264, for our environment, she is as close to ideal as we have made.

Bruin Envy 7248
Full brother in blood
to Lots 35-37.

BEEF SOLUTIONS TOOLBOX

Performance

This natural calf of 8616 was the heaviest of his calf crop and she is 11 years old. His mother was flushed and therefore he was in a contemporary group by himself with ratios of 100. He received no special treatment, but we take our contemporary grouping seriously and he wasn't always in the same field as the others. He is a full brother in blood to Bruin Endorsement 7255, last years high seller. This bull is powerful and a real good one.

DIVERSE & UNIQUE ENVIRONMENTS

*For a cowherd to be **profitable** and **problem-free**, selection pressure must be placed on bulls that are from females developed to **thrive** in that environment.*

Diverse and unique environments require breeding philosophy specific to that environment. The primary **profit driver** in a commercial cow/calf operation is **COWHERD RETENTION**. By paying close attention to **maternal lines** that are developed to have **longevity**, much of the cull rate can be minimized. For a cowherd to be **profitable** and **problem-free**, selection pressure must be placed on bulls that are from females developed to **thrive** in that environment.

Barrett 5254 of 4004 RE

The major draw to purchasing this sire is the breeder's long standing commitment to foot quality, fertility and longevity. 5254 is a full brother to AI bulls Barrett Super Duty and Powerstroke. He combines the power of Resource with the length and femininity of 4004, whose feet, udder, quality and fertility have stood the test of time in the Barrett and Fink Programs in Kansas. Raised on the side of his 11 year old dam, we see 5254 as one of the very best sons of Resource available. The sons of 5254 are masculine and thick, while the daughters are elegant fronted, big bodied and look to have the development of fantastic udders. We calve the first daughters this fall.

**Reference sire 5254
on side of his dam at
11 years of age.**

Barrett 5254 of 4004 RE • Sire of Lots 58-67.

BEEF SOLUTIONS TOOLBOX

We **optimize** cowherd **PERFORMANCE** through **CONSISTENCY**, producing the most pounds our **natural environment** will support.

MAKING A LOGICAL CASE FOR SIMGENETICS

by Marty Ropp,
Allied Genetic Resources

Before I go any further there are a few important facts about breeds and the beef business that need to be cleared up.

1. Maximum commercial profitability requires heterosis, which results in 25% more lifetime production and 1.5 years greater longevity per commercial female than their purebred counterparts. (Confirmed by almost every crossbreeding research trial reported for the past 40 years)
2. Continental x British crossbred cattle make more money year in and year out for cow/calf operations, cattle feeders and packers than any other breed combinations. (US Meat Animal Research Center Report 1, 2, 3,...22)
3. Angus, Red Angus and Hereford, in that order, are the British breeds of choice in the US and are an important and necessary part of the American beef business. (Based on annual breed association registration information)
4. Simmental is the highest ranking Continental beef breed in the US for direct calving ease, maternal calving ease, puberty, weaning weight, post weaning gain, % Choice, tenderness, and most measures of feed efficiency. (US MARC Research Center Report #22)

If you consider these facts, there are several logical conclusions that become evident. First, regardless of some marketing propaganda to the contrary, progressive, profit-driven commercial cattlemen use crossbreeding to enhance their success.

The second conclusion is that the most successful crossbreeding systems utilize the complimentary traits of British and Continental breeds in combination. Data from the ASA Carcass Merit Program suggest these Simmental-British cross cattle will finish at around 1300 pounds, grade Choice or better at a rate of 74% and with an average fat depth of .4 inches of fat, while placing nearly 60% of the carcasses in Yield Grades 1 and 2. This is not to guarantee that a 50/50 combination is right for every situation. For most, somewhere between 25%/75% and 75%/25% will be optimal with an American breed component often being advantageous in

heat-challenged climates. These producers count on British breeds to contribute maternal efficiency, marbling and convenience while the Continental component offers accelerated performance, carcass cutability and growth efficiency to their programs.

Conclusion number three: Angus is by far the most popular British breed in the US. This is not a slur toward other British breeds, nor does it mean it has always or will always be this way, but today it is a fact. Actually, the Angus and Red Angus gene pools and breed strengths are so similar they could be considered one for the purpose of crossbreeding programs.

Finally, if you accept facts 1-4 above, one must choose a Continental component to complete the puzzle and Simmental is the logical choice.

After years of advanced genetic evaluation, a commitment to research and consistent breed improvement, Simmental and SimGenetics are poised to fill that position as the most logical and profitable choice for Continental genetics. No other Continental option offers the combination of growth, carcass value, calving ease, maternal and efficiency traits that Simmental does.

Some provide comparable terminal value, others bring some useful maternal traits to the table, but SimGenetics combine both. In fact, they rank first or second in almost every economically important trait category listed in the latest MARC data. This is no accident. The ASA's Carcass Merit Program, Calving Ease Project, Tenderness Testing and new Feed Efficiency research programs are all member-funded and provide significant opportunity to evaluate and prove the next generation of superior genetics.

When you combine this with the largest database among all Continental breeds and the most proven multi-breed genetic evaluation in the entire US beef industry, Simmental breeders have all the tools necessary to make positive, consistent change faster than our competitors.

So whether you choose Simmental to complement British breed commercial females or one of our popular SimGenetics options to preserve a balance of Continental and British genetics while retaining heterosis in your herd, you can be confident you are using all of the facts available to make the most logical choice possible.

Win a

FREE BULL!

Immediately following the conclusion of the sale, there will be a drawing for a **FREE BULL**. After the gavel drops on the final bull, we will draw a lot number from a pot and that bull will be given a credit towards the purchase price equal to the final sale average. If the bull selected is less than the average, then the bull is FREE with no cash compensation. The winner must be present to receive the award.

for this generous donation!

Circle Ranch

Environmental adaptability is one of the most important breeding goals at Circle Ranch. Cows should work for their owners, not the other way around. We run our cows in a similar fashion to the majority of our customers to help ensure they will work in a variety of environments and promote profitability. That, too, is part of the reason we harness the power of heterosis to create a more durable genetic product capable of breeding and lasting longer regardless of the environmental challenges posed. We absolutely have a herd target for mature size that we think best fits the majority of our customers and the larger beef industry. The lions share of our bulls hit that target dead center and many of our customers prefer them. On the edges however you will find genetics here that can produce power house performance for higher resource situations as well as some lines created to minimize maintenance requirements for low-input regions.

Cows should WORK
for their **OWNERS**,
not the other way around.

Developing our Bulls at Home

This year Circle Ranch made the decision to invest the dollars and make the time commitment in feeding our bulls at home. Implementing a major change like this we felt it imperative we accomplish five major goals.

Ration. Increase the fiber in our ration to promote a slower more consistent rate of gain. By taking advantage of our feed resources on our home ranch a large part of their diet is haylage that was harvested from our irrigated pastures here at home. What you will notice sale day are bulls that are slightly lighter in weight and condition but are freer moving, more athletic and will not lose as much weight during the breeding season.

Pen size. Because we have the land available we thought it was critical to Increase pen size to several acres each with some elevation change to ensure the bulls get adequate exercise to keep their joints and structure ready for turnout. During the first 60 days of development the bulls had ample access to grass but during the last 60 days were in a more traditional bull development setting but still have the large pen sizes.

Customer service. We have always felt bull development is a very important part of our customer service and believe our bulls have always been grown out properly in the past. But growing our bulls in a more ranch type setting with the larger pens gives us the opportunity to take our bull development to the next level.

Monitoring bulls daily. Seeing the bulls on a daily basis has been an added benefit to developing our bulls at home. Watching them develop from day one and managing their consumption has given us a new appreciation for others in the bull development business.

Customer access. We encourage customers visit the ranch and view the bulls at anytime from day one to sale day and having the bulls at home makes that more convenient.

Circle Power Grid D63 • Sire of Lots 76-79.

Circle Power Grid D63:
 D63 sold in our 2017 sale to Ron Gilliland and we felt he was just too good to not use. His sons are powerful but still smooth made and have logged some of our heaviest weights this year. All of his daughters made our replacement pen and have that brood cow look.

TJ Diplomat 294D • Sire of Lots 80-90.

TJ Diplomat

We chose Diplomat because of his excellent growth and carcass numbers and also has moderate calving ease. His sons seem to match his EPD profile with adequate muscle and still plenty of growth. We kept nearly all of the daughters for replacement and like their brothers they weighed heavy but still have a feminine look.

Circle Alumni C767 • Sire of Lots 95-101.

Circle Alumni C767

Circle Alumni C767 sold in our 2016 sale to Gilliland Livestock. His sons are big hippered, deep-bodied and his daughters are making the kind of cows we strive for. His OCC Great Plains dam brings in a heavy calf every year and a full brother to Alumni, Lot 165, sells this year!

Hook's Beacon 56B67 • Sire of Lots 105-107

Hook's Beacon 56B

- One-of-a-kind proven Purebred sire of value to enhance profit for the beef business.
- The more data that comes in the more dominant his genetic profile becomes. Currently the #2 most used sire for registrations at ASA.
- At publish date he ranks as the #1 \$API and \$TI proven Purebred (WW Acc .91) in the breed. #4 for MB EPD and #7 for REA.
- Slam dunk calving ease choice for mating heifers of any breed.
- Beacon is a true improver for feet as well, consistently siring extra heel depth and exceptional claw shape!
- Semen now also available from ABS Global.

3C Pasque 4331B • Sire of Lots 110-112

3C Pasque 4331B

Raised by John Christensen in South Dakota, 3C Pasque is a bull we selected to produce some purebreds. Moderate, smooth-made and known for producing daughters with outstanding udders, we flushed him to our Purebred donor Circle Olie W11. To date, W11 has produced 40 bull calves and most have sold near the top of our sale. If you're looking for a higher percent Simmental bull, check out these three full brothers!

Circle Old School B62 • Sire of Lots 149-157

Circle Old School

In 2013, we made an agreement with Tom Hook of Hook's Farms in Tracy, Minn., to flush one of his high-valued Simm-Influenced females that fits our program to a tee: Hook's Extravaganza 7X, a moderate, deep-bodied GW Lucky Man daughter with excellent foot and udder quality. We mated her to the maternal great Leachman Right Time. The mating produced our 2015 high seller: Circle Old School B62 that went to our cooperators, Wang Ranch of Baker, Mont. Wangs have AI'd more than 500 cows to Old School, who has become a cornerstone of their program. Old School sires high-value females, as well as stout, heavily muscled bulls.

Hook's Broadway 11B: Easily the most talked about purebred Simmental in his contemporary group, Broadway was a must-use for progressive seedstock operations. Broadway is pure power with breed-leading indicators for performance and growth. As an added bonus, Broadway combines his performance with an outstanding phenotype. Early reports of Broadway daughters are positive with the broodiness and body depth that indicates long-term usefulness in a cowherd.

The dam of this moderate, easy fleshing heifer has a beautiful udder and is very big middled. She traces back to our foundation Evergreen cow.

The natural calf off of possibly the most powerfully built cow on the ranch. Her dam is a maternal sister to Rubicon that we have flushed several times, the 5254 daughters are beautiful and angular, this heifer will be a good one.

We are only selling the natural calves off of some of our best donors because we have so many embryo daughters coming into production. This heifer shows a lot of promise, out of one of the most feminine and powerful cows on the ranch.

Extreme fleshing ease on this Kozi 418 daughter. This heifer is outcross to many of the popular lines of today, which makes her a flexible breeding piece for many programs

We thoroughly *enjoy and prefer* to show you the cattle **IN PERSON**, but realize that it isn't always possible for you to get away. We are growing our **ONLINE PRESENCE** to make it **EASIER for YOU** to evaluate & bid on the offering!

UPDATED EPDS, SALE ORDER and VIDEOS will be available on our respective websites a few weeks before the sale.

To watch videos, visit us online at:

www.CircleRanch.net

www.BruinRanch.com

Follow us on social media for more timely updates:

/BruinRanch • @bruin_ranch

Cattle will also be available for inspection beginning Tuesday, Sept. 24 through the conclusion of the sale.
